

| Quick prototype

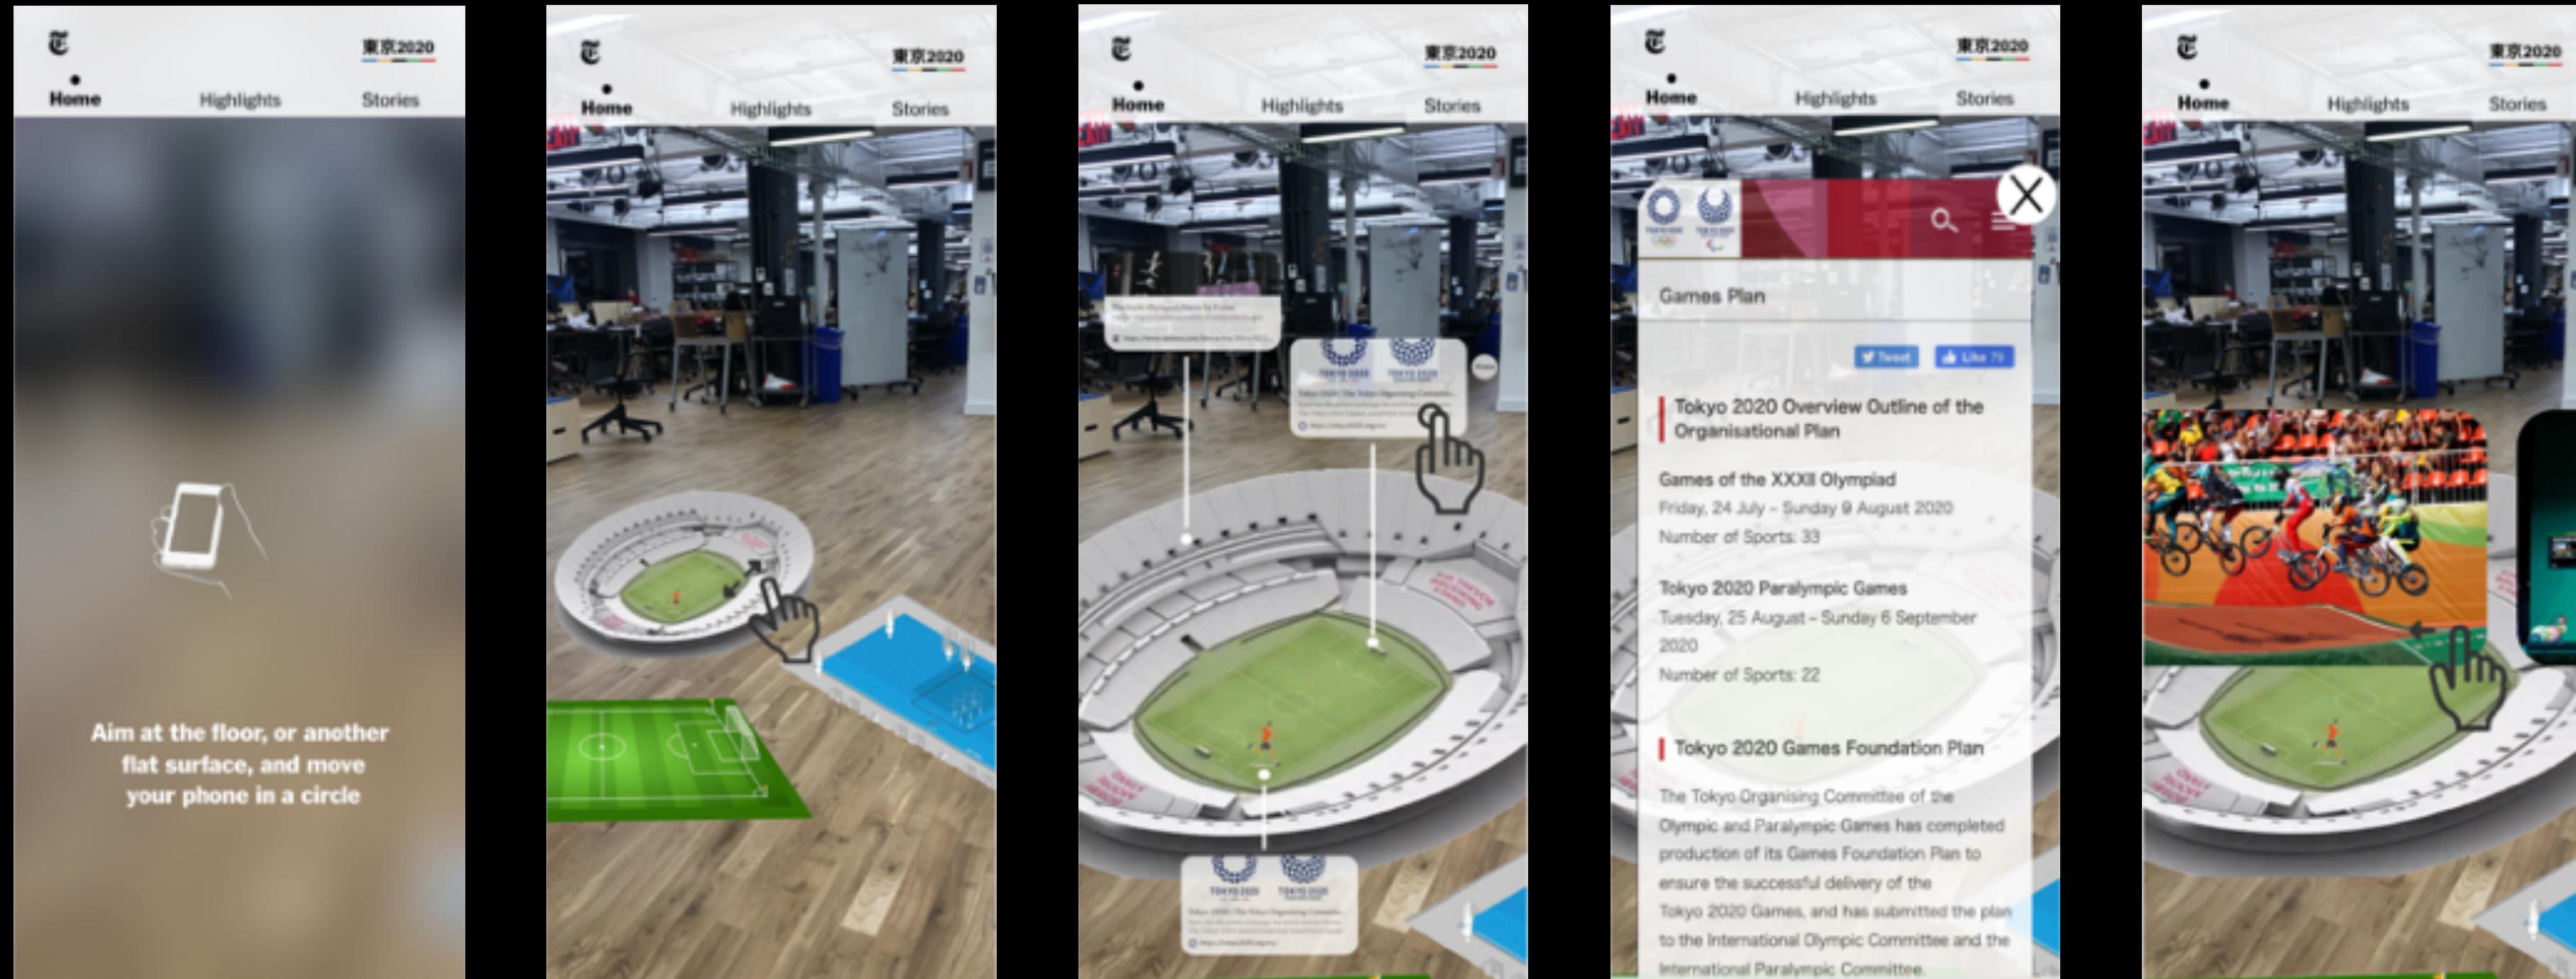

Landing page

- Landing page displays the score board of all national teams.
- For the data curation, people can choose their nationality.
- During an olympic season, nationality is the most significant category compared to others. Hence we chose 'nationality' as one of the main options.

Main page

- All information will be curated based on users' selection.
- Users can see the stadiums as floating AR elements, where they can zoom in to see upcoming schedule of events, articles and photos at the specific locations.
- Tokyo 3D stadium can be created by photogrammetry / 3D modeling.
